Interview Summary

Applicants thank the Examiner for the courtesies extended during the interview of 23 August 2005. During the interview, the Examiner and Applicants' representatives discussed submitting a Supplemental Reply and the current mailing address for Applicants' representatives.

Rejections Under 35 U.S.C. § 103

Claims 1, 2, and 15-18 stand rejected under 35 U.S.C. § 103(a) as being allegedly unpatentable over U. S. Patent No. 4,485,379 issued to Kinoshita, *et al.* ("Kinoshita") in view of U. S. Patent No. 6,265,833 issued to Kim, *et al.* ("Kim") and in view of U. S. Patent No.

5,027,036 issued to Ikarashi *et al.* (“Ikarashi”). Applicants respectfully traverse this rejection for at least the following reasons.

Assuming *arguendo* that the cited references may be combined, the combined references do not disclose or suggest all of the claim limitations. Amended claims 1 and 15 recite, *inter alia*:

wherein said scan control signal controls a scan direction of said plurality of scan lines, a number of said plurality of scan lines that are selected, and a location of said plurality of scan lines that are selected

The prior art of record does not show or suggest such features. Rather, Kim’s operation modes set an “optimal driving current and optimal driving voltage.” (Col. 6, line 36 – Col. 7, line 2; FIG. 4). Therefore, Applicants respectfully submit that claims 1 and 15 are patentable over the prior art of record.

Claims 2 and 16-18 depend from claim 1, which is an allowable claim. Hence, claims 2 and 16-18 are also allowable. Accordingly, Applicants respectfully submit that claims 2 and 16-18 are patentable over the references of record.

Since none of the other prior art of record, whether taken alone or in any combination, discloses or suggests all the features of the claimed invention, Applicants respectfully submit that independent claims 1 and 15, and all the claims that depend therefrom, are allowable.

Claims 3-14 stand rejected under 35 U.S.C. § 103(a) as being allegedly unpatentable over Kinoshita, Kim, and Ikarashi in view of Kuwata, *et al.* (“Kuwata”). Applicants respectfully traverse this rejection for at least the following reasons.

Claims 3-14 depend from claim 1, which is an allowable claim. The additional reference of Kuwata does not cure the deficiency of Kinoshita, Kim and Ikarashi. Hence, claims 3-14 are also allowable.

Accordingly, Applicants respectfully request withdrawal of the 35 U.S.C. § 103(a) rejection of claims 1-18. Since none of the other prior art of record, whether taken alone or in any combination, discloses or suggests all the features of the claimed invention, Applicants respectfully submit that independent claims 1 and 15, and all the claims that depend therefrom are allowable.
